

PRODUCTION WORKSHOP

The highly qualified team of panel assemblers operates in our top-of-the-art **production workshop**, which includes the ModCenter 293, a numerically controlled machine tool unique in the province of Quebec. From control panels to VFD, PLC, networking, starter and lighting panels, we show great versatility. We are in a partnership with our clients, attentive to their needs and mindful of deadlines. Our team can guide you through each or different phases of the project: design, manufacturing, assembly, programming and installation.

OUR SERVICES:

- Needs assessment
- Engineering and design
- Control panel design, manufacturing and assembly
- Systems programming
- Panel installation
- Risk Assessment and Securement

PRODUCTS:

- Control Panels
- Variable-Frequency Drives
- Instrumentation Cabinets
- Operating Consoles
- Custom Progressive Starter Panels and Variable Speed Gear
- Power Panels / Control Panels
- Connecting Boxes

FIELDS OF EXPERTISE:

- Aeronautics, Aerospace and Defence
- Agri-food Industry
- Biotechnology
- Chemistry and Petrochemistry
- Energy (Aeolian and Hydroelectricity)
- Environmental
- Metallurgy and Mining
- Pulp and Paper Industry
- Pharmaceutical Industry
- Water treatment
- Original Equipment Manufacturer
